Appendix I: Healthier Replacement Choices for Vending Machines ................. 12

This assessment is provided by Tri-County Health Department through the Healthy Beverage Partnership, a regional effort to reduce obesity and chronic diseases in seven counties in the Denver metropolitan area. The Healthy Beverage Partnership is sponsored by the Colorado Department of Public Health and Environment through the Cancer, Cardiovascular and Pulmonary Disease (CCPD) Grants Program.
Introduction and Background
Tri-County Health Department (TCHD), as part of the regional Healthy Beverage Partnership, provided a complimentary vending assessment to the City of Northglenn. Current site contacts include Becky Smith, Steve Hensley, and Jessica Clanton. The purpose of the assessment was to understand the existing food and beverage vending environment at Northglenn for visitors and employees and provide recommendations for nutritious additions, changes, or improvements. The assessment analyzed 3 concession stands and 3 snack and beverage vending machines in 4 City locations, existing policies and free tap water access.

Tri-County Health Department is excited to partner with Northglenn in developing and promoting healthier vending and concession changes. Potential vending and concession changes could impact approximately 250,000 visits each year by recreation center members, city visitors, or volunteers. Changes would also directly impact 287 City of Northglenn employees.

Results
Currently Northglenn overall has 13% healthier snacks and 29% healthier beverages.

To expand upon these current healthier options, there are some modifications, replacements and additions that can be made. Please see Appendix I Healthier Replacement Choices for a detailed item list. An ideal ratio to work towards in vending would be at least 60% healthier foods and beverages in all locations, with 75% - 100% being optimal.
Healthy Guidelines for Foods

Recommendations

Labeling & Signage
Labeling can help educate customers, and nutritional information will be required by the FDA for vendors with a minimum of 20 machines by July 26, 2018.

➢ Consider a machine that digitally provides the nutrition label info for each product

➢ Ensure new beverage machines have water wraps or a clear front rather than sugary drink wraps

➢ Move the healthier options to the top buttons for beverages, or eye level for snack machines

➢ Use stickers to label snack machines with healthier option criteria (some vending companies will have wraps/branded stickers)

➢ Add posters stating “check out our new options” or listing better options

Current ad on soda machine – remove ads and replace with water wraps or clear fronts

Water wrap – a great option

Great start with labeling, need to expand labeling to be consistent on all machines and increase healthier options

Results showed a lot of duplicate unhealthy items, especially candy.

Positive Labeling Examples

Example of visible labeling and messaging, from City of Golden

Example of a positive beverage wrap with clear front, from City of Broomfield

Better Hydration
Did You Know...
Drinking one can of regular soda a day can result in an extra 14 pounds of weight gain a year?

Quench your thirst and cut the calories with water, or try these other zero calorie beverages!
- Coke Zero
- Diet Coke
- Diet Dr. Pepper
- Diet Ice Tea
- Diet Mountain Dew
- Diet Pepsi
- Seitzer Water
- Sprite Zero
- Unsweetened Iced Tea

Products are available for purchase from the Healthy Snacking Machines.

Better Snacking
Did You Know...
One candy bar has the same amount of calories and fat and almost double the amount of sugar of four chocolate chip cookies?

Satisfy your hunger with a snack packed with whole grains, seeds, or dried fruit for a more filling, healthier treat!
- Betty Crocker Oatmeal Bars
- David Pumpkin Seeds
- David Sunflower Seeds
- Funky Monkey Dried Fruit Snacks
- Kellogg Nutri-Grain Bars
- Nature Valley Crisps
- Sensible Foods Dried Fruit Snacks

Products are available for purchase from the Healthy Snacking Machines.
Replacements

Some items have healthier replacements to consider.
- See Appendix I **Healthier Replacement Choices** for new healthier snack and drink options, or cross reference with Canteen’s Choice Plus list
- Remove duplicate unhealthy items, i.e. wildberry and regular skittles, different candy sizes
- The following items are the unhealthiest options, consider removing them as a first step:
  - **Highest in calories:** Hostess Mini Chocolate Frosted Donettes, Poptarts Frosted Strawberry, Dolly Madison Zingers, Kit Kat Large
  - **Highest in sodium:** Rold Gold tiny twists pretzels, Dolly Madison Zingers, Jack Link’s Prime Rib Jerky, Cheetos Flamin Hot Crunchy, Cheetos Crunchy
  - **Highest in sugar:** Giant Gumballs, Trolli Sour Brite Eggs, Trolli Sour Brite Crawlers, Swedish Fish, Trolli Squiggles
  - **Items with trans-fat:** Blue Bunny Cookies & Cream Ice Cream Sandwich, Blue Bell Ice Cream Chocolate Éclair, Gardettos
- **Beverages:** consolidate/remove the duplicate rows of unhealthy drinks, reduce the amount of regular soda, regular sports and energy drinks and replace flavored teas with more unsweet teas

Additions

Please see Appendix I **Healthier Replacement Choices** for a detailed vending item list with new options to choose from.
- Consider adding more **fruit snack options**, i.e. fruit bar, fruit leather, GoGo squeeze
- Consider adding more **protein options** and also high-calorie but healthy options at key sites for workers that need calorie dense snacks. See section in Appendix I **High Protein Healthier Items** snack list
- **Ice cream vending:** consider adding Blue Bunny real-fruit sorbet, fruit popsicles, frozen yogurt, or no-sugar added vanilla, chocolate and strawberry ice cream cups
- **Beverages:** consider adding flavored low-sodium sparkling water (i.e. La Croix), an unsweet iced tea, natural fruit juice iced tea, or unsweetened iced coffee

Pricing

Using price differentials has been shown to help customers choose healthier options that are affordable while maintaining business profit levels.1
- A good option would be to decrease healthy items by .25 and increase the other items by .25
- One easy place to start this is beverages. By moving water (and other healthier beverages recommended in the above Additions section) to eye level on vending machines and decreasing their price by .25 they are easily highlighted. Increase regular soda by .25
- Consider an employee discount for the healthier items (would need to label items)
- Keep healthy snacks in the same price range as unhealthy, make them less expensive if possible
- Track first year sales, to know impact of changes

---

Site Specific Notes
An overall recommendation would be to revamp purchasing practices for concession stands across multiple city locations. This could include implementing new purchasing policies and/or guidelines to ensure consistency across sites. This practice could also both reduce the number of unhealthy options and increase the number of healthy options.

Current machines have some duplicity with unhealthy items, i.e. candy and beverage options. Consider removing all duplicate products and converting certain snack and beverage machines to be 100% healthier.

- Explore feasibility of installing filling stations and increasing water fountains
- In choosing new products, try to include a variety of fruit, whole grain, and protein options. Taste testing could provide helpful feedback.
- Consider the positives and negatives of concession stands versus traditional vending machines.
- Tie the new changes to an employee wellness or city-wide challenge
- Promote the new changes with a joint press release with TCHD

Policies\(^2\) and/or Guidelines\(^3\)
A policy or guideline is an important step to ensure the changes made are sustainable. It also provides an easy guide to follow and a great way to promote that you care about the youth, families, and employees you serve. Consider a policy or guideline that meets at least 60% healthy options, perhaps with a tiered approach to reach 100% in a certain timeframe and for certain machines. The guideline should also consider adding nutrition labeling to machines. Other options include different policy percentages for snack vs. beverage, for example 60% healthier snack and 80% healthier beverage, since the beverage baseline is higher already, and healthier beverages can be more easily attainable.

We can provide template for the below policy options:

- Healthier Vending Policy, including using healthy signage/advertisements
- Healthier Meeting & Event Policy
- Healthier Concession Stands

\(^2\) Definition of policies: Mandatory business rules or statements.
\(^3\) Definition of guidelines: Advice/suggestion on how to act in a certain situation. Recommended but non-mandatory.
Next Steps Checklist

☐ Determine current vendor contract and what products they offer that meet the healthier guidelines
☐ Present Report to other Leaders/Key Decision Makers
  - October 19 Northglenn HEAL Committee Meeting
  - Other Northglenn Leadership or Community Organizations
☐ Choose a percentage of healthy beverages and snacks to be a guideline or policy for new products.
  - Recommend 1 policy and 1 environment goal (see Implementation Worksheet p. 12)
☐ Create education steps for informing employees & visitors of changes.
☐ Decide how Tri-County Health Department can support your changes (i.e. template policy, choosing new items, signs or stickers, promotion & press release)
☐ Schedule next meeting (if applicable)

Reassessment and Lessons Learned

TCHD would like to reassess City of Northglenn within one year, to document changes made. This reassessment can also look at sales of healthier items, provide continued changes or support, and record lessons learned. This information will be valuable to City of Northglenn, Tri-County Health Department, the Healthy Beverage Partnership, and also other cities in the region looking to make similar changes.

### POLICIES AND/OR GUIDELINES

| There are healthy food and beverage policies or guidelines in place                   |     |      | X    |
Organization: City of Northglenn

Date:

Collaborators:

1. Reviewing the list of recommendations, what do you view as the “lowest hanging fruit” or where would you like to begin?

2. Do you have additional changes that you would like to make that aren’t on the list?

3. Who else needs to be involved (or bought-in) to make these changes happen?

4. Who will “own” this work to lead the development? Implementation? Maintenance?

*Example Goals:*

1) Create and implement a healthier vending policy so that machines contain X% healthier items per Healthy Beverage Partnership standards.

2) Add signage at key points to encourage healthy vending purchases.

</table>
In this document, we will explore healthier options for vending machines, focusing on alternatives to candy bars and crackers, along with high protein items. Let's dive into our recommendations:

**Instead of candy bars, consider...**
- California almonds
- Cashews
- Cinnamon Toast Crunch Cereal Bar
- Cocoa Puffs Cereal Bar - 96 Ct.
- FSTG Real Good Bar Chocolate Hazelnut
- Kars roasted salted almonds
- Justins PB cups
- Planters salted peanuts
- Premium duet nuts - cashews & almonds
- Mr. Nature Happy Trail Mix
- Mr. Nature Oriental Mix
- Nugo Dark Chocolate Chip or Mocha Bar

**Good cracker options...**
- Smartfood Selects Garlic Tomato Basil Hummus Chips
- 100 Calorie Cheddar Goldfish made with Whole Grains
- Austin Zoo Animal Crackers
- Chex Mix Hot n' Spicy 60 count
- Late July Cheese or Peanut Butter Crackers
- Pirate's Booty
- Quaker Snack Mix Kids Mix
- Smartfood White Cheddar Popcorn
- Rold Gold Heartzels
- Scount Sea Salt pumpkin seeds
- Simply Chex Chocolate Caramel
- Simply Chex Snack Mix Habenero Lime Xtreme
- Smartfood Selects Feta & Herb Hummus Popped Chips
- Snackwell’s Vanilla Crème Sandwich
- Snak King The Whole Earth Kettle Corn
- Snyders Lance Mini or Olde Tyme Pretzels
- Special K® Popcorn Chips Sweet & Salty
- Spikerz Vending - Spicy Cracker Bites (Buffalo or Nacho Cheese)
- Whole grain Cheez its

**Good fruit options...**
- Apple-2-the-Core Peeled
- Much-Ado-About-Mango Peeled
- Mr. Nature Raisins or Fruit Mix
- Nu Health - mango pineapple apple, pineapple, peach pineapple pear, pineapple mandarin, mandarin orange
- GoGo Squeeze

**Chips that are healthier...**
- 100 Calorie Wheat Thins Toasted Chips
- Baked flaming hot Cheetos
- Baked Naturals Cracker Chips/Multi-grain
- Baked or Reduced fat Doritos nacho
- Baked Lay’s BBQ or Sour Cream & Onion
- Cheetos Fantastix
- Food Should Taste Good Tortilla Chips- Jalapeno
- Lays Kettle Cooked Jalapeno or Original
- Poppchips BBQ or Original
- PopCorners Cheesy Jalapeno
- Reduced fat Cheetos puffs
- Reduced fat Cool Ranch Doritos
- Reduced Fat Spicy Sweet Chili Doritos
- Smartfood Selects Sweet BBQ Popped Chips
- Special K Cheddar cracker chips, BBQ, Sea Salt, Sour Cream & Onion
- Tostitos oven baked

**High Protein Healthier Items**
- Blue Diamond Whole Natural Almonds
- Cheerios Cup Cereal
- CLIF Bar Oatmeal Raisin Walnut
- CLIF Luna Bar - Choc Peppermint Stick
- CLIF Luna Bar - Lemon Zest
- CLIF Luna Bar - Nutz over Chocolate
- CLIF Luna Bar - White Choc Macadamia
- CLIF Mojo Mountain Mix
- CLIF Mojo Peanut Butter Pretzel
- General Mills Berry
- Kars Nuts Almonds
- Kars Nuts Original Unsalted Trail Mix
- Kars Nuts Salted Cashews
- Kars Nuts Salted Peanuts
- Kashi® GOLEAN Crunch!® Cereal-in-a-Cup
- Kashi® GOLEAN® Cereal-in-a-Cup
Kashi® GOLEAN® Chewy Bar Oatmeal Raisin
